

Black Phosphate Drywall Screws

These black phosphate-coated drywall screws are used for fastening drywall to wood or metal studs. They feature a sharp point for easy penetration and a bugle head for flush installation.

Product Overview

Professional Drywall Fastening Solution

These black phosphate-coated drywall screws are engineered for secure and efficient fastening of drywall panels to both wood and metal studs. Featuring a sharp, precision-engineered point and a specialized bugle head, they ensure easy penetration and a clean, flush finish without damaging the drywall surface. The coarse thread pattern provides superior holding power, while the durable black phosphate coating offers essential corrosion resistance for long-term reliability in interior applications.

Technical Specifications

Coating	Black Phosphate
Head Type	Bugle Head
Thread Pattern	Coarse Thread
Key Features	Corrosion Resistant, Sharp Point, Flush Finish

Usage & Compatibility

Compatible Substrates

- Wood Studs
- Metal Studs

Drive Method	Power Drill or Screw Gun
