

Black Phosphate Drywall Screws for Garment and Shoe Manufacturing

High-performance drywall screws engineered for secure fastening in various garment, shoe, and accessory manufacturing applications. These screws feature a sharp point for easy penetration and a bugle head for flush seating.

Product Overview

Industrial Fastening Solutions

These high-performance drywall screws are precision-engineered to provide secure, reliable fastening for demanding garment, shoe, and accessory manufacturing environments. Featuring a sharp point for rapid, easy penetration and a bugle head design that ensures flush seating, they are optimized for both automated assembly lines and manual applications. The durable black phosphate coating offers essential corrosion resistance while minimizing glare for a clean, professional finish.

Technical Specifications

Surface Coating	Black Phosphate
Head Design	Bugle Head
Point Type	Sharp Point

Application Features

Compatibility	Automated Machinery, Hand-Driven Tools, Garment Manufacturing, Shoe Manufacturing, Accessory Assembly
---------------	---

Performance Benefits

Performance Highlights

1 Grade Corrosion Resistance	100 % Glare Reduction
