Product Overview

Professional Grade Drywall Fasteners

These black phosphate drywall screws are engineered for secure attachment of drywall panels to both wood and metal studs. Featuring a sharp, precision-piercing point and a bugle head design, they ensure easy penetration and a flush finish without damaging the drywall surface. The specialized black phosphate coating offers essential corrosion resistance while minimizing friction during high-speed installation.

Technical Specifications

Coating	Black Phosphate
Head Style	Bugle Head
Point Type	Sharp Point

Usage & Compatibility

Key Benefits

- Reduced friction during installation
- Flush seating without paper tearing
- Easy penetration into studs

Applications	Drywall Installation, Wood Stud Framing, Metal Stud Framing, Professional Construction, DIY Projects
Corrosion Resistance	Yes
