

Black Silicon Carbide Grinding Wheel

This black silicon carbide grinding wheel is designed for grinding applications. It is suitable for materials with low tensile strength, such as gray cast iron, non-ferrous metals, non-metallic materials, stone, ceramics, glass, and refractories.

Overview

Premium Black Silicon Carbide Grinding Wheel

This black silicon carbide grinding wheel is engineered for efficient material removal and long-lasting performance in demanding grinding and sharpening applications. It is specifically designed for materials with low tensile strength, making it an ideal choice for gray cast iron, non-ferrous metals, and non-metallic substances. With a precision-balanced construction, this wheel ensures smooth operation and reduced vibration, suitable for both bench and pedestal grinders.

Technical Specifications

Application Suitability

- Grinding
- Sharpening

Equipment Compatibility

Bench Grinders • Pedestal Grinders

Abrasive Material

Black Silicon Carbide

Compatible Materials

Gray Cast Iron, Non-ferrous Metals, Stone, Ceramics, Glass, Refractories, Silicate Materials
