

Black Spaghetti Server Spoon with Toothed Edge

This spaghetti server spoon is designed for efficient and mess-free serving. It features a toothed edge to grip and separate spaghetti, and a central hole for draining water.

Product Overview

Professional Spaghetti Server

This black spaghetti server is a professional kitchen essential designed for efficient and mess-free pasta service. Featuring a specialized toothed edge, it provides a secure grip on noodles, while the central drainage hole ensures excess water is removed during serving. Built from durable and heat-resistant materials, this tool is perfectly suited for high-volume commercial or professional culinary environments.
