

Blade Soil Scraper for Landscaping

This blade soil scraper features a replaceable high carbon steel blade and tilt angle adjustment. It is ideal for landscaping, leveling, and finish grading.

ADDITIONAL IMAGES

Overview

The scraper features a robust frame and support wheel for precise depth control during grading.

Versatile Landscaping & Grading Solution

The Blade Soil Scraper is a robust agricultural attachment engineered for professional landscaping, land leveling, and finish grading. Featuring a high-carbon steel blade and adjustable tilt angles, it provides the precision needed for surface preparation and maintenance. This implement is designed for durability and ease of use across various soil conditions and tractor power ranges.

Key Features

Engineered for efficient material distribution and accurate surface leveling.

Standard Features

- Replaceable high carbon steel blade
- Tilt angle adjustment for precise grading
- Ideal for landscaping and leveling
- Suitable for finish grading applications
