Product Overview

Modern Bladeless Air Circulation

This bladeless tower fan features a sleek, modern design engineered for efficient and quiet cooling. Utilizing cross-flow technology, it generates a smooth, powerful airflow without visible blades, ensuring enhanced safety and ease of maintenance. Its slim profile and stable base make it an ideal cooling solution for various professional and home environments.

Technical Specifications

Power Consumption

40 W
Power

Performance Features

- 3 adjustable speed levels
- Low noise operation
- Cross-flow air supply for soft wind
