

# Blank CD/DVD Optical Discs

CD and DVD media are blank optical discs used for data storage. They feature a central spindle hole for compatibility with optical disc drives.

## Product Overview

### High-Quality Optical Storage Media

These blank optical discs are designed for reliable data storage, music archiving, video distribution, and software backups. Constructed from high-grade polycarbonate, they ensure consistent laser reflectivity for accurate reading and writing performance. Ideal for professional and personal use, these discs provide a stable medium for long-term digital preservation.

## Technical Specifications

### Drive Compatibility

CD-R/RW • DVD-R/RW

### Material Composition

Polycarbonate

### Primary Applications

Data Backup, Audio Recording, Video Distribution, Software Archiving
