

Blow Molding Machine for Plastic Containers

This blow molding machine is designed for the efficient production of plastic containers and parts. It features robust construction, precise control systems and high output capacity.

Product Overview

Efficiency and Precision

The TJ2000 Series is a high-performance blow molding machine engineered for the efficient production of high-quality plastic containers. Designed for reliability and consistency, this unit offers robust construction and precise control systems, making it a dependable choice for manufacturers in the plastic and rubber industry. With an impressive output capacity, it is optimized to streamline production workflows while maintaining rigorous quality standards for various plastic resins.

Technical Metrics

Production Capacity

1800 pcs/h

Hourly Output

5 L

Max Container Volume

Machine Details

Feature	Description
Series	TJ2000
Max Capacity	2 x 5L
Example Output Target	500ML Bottle
