

Blue Calcined Aluminum Oxide Abrasive Flap Discs

Flap discs constructed with blue calcined aluminum oxide abrasive cloth offer aggressive cutting action and long life. The overlapping abrasive flaps wear away, constantly exposing new abrasive for consistent performance throughout the life of the disc.

Product Overview

Professional Abrasive Solution

These flap discs are constructed with blue calcined aluminum oxide abrasive cloth, engineered to provide aggressive cutting action and extended service life. The overlapping abrasive flaps are designed to wear away gradually, consistently exposing fresh abrasive material for reliable performance throughout the life of the disc. They are an essential tool for metalworking, construction, and automotive professionals requiring high-quality surface finishing.

Applications

Primary Uses

- Polishing welding lines
- Weld blending
- Deburring
- Surface blending
- General purpose grinding

Suitable Materials

Hard Metal, Stainless Steel, Casting Metal, Aluminum, Non-ferrous Metals

Technical Details

Abrasive Material

Blue Calcined Aluminum Oxide
