

Blue Epoxy Coated Ductile Iron Pipes for Water Supply

Ductile iron pipes feature a blue epoxy coating for enhanced protection. Designed for municipal water supply, these pipes withstand high pressure and resist corrosion.

Overview

Durable Water Infrastructure Solutions

These ductile iron pipes are engineered for municipal water supply projects, featuring a protective blue epoxy coating for enhanced corrosion resistance. Designed to withstand high pressure, they offer long-term reliability and durability for underground installation. With a wide range of available diameters and lengths, these pipes are built to reduce maintenance costs and ensure consistent performance in water distribution systems.

Technical Specifications

Available Lengths

- 6 meters
- 8.15 meters

Diameter Range	DN80 - DN2600mm
Coating Type	Blue Epoxy

Quality & Compliance

Certifications	ISO 9001, ISO 14001, GB/T 28001, BV Certified, KS Certified
----------------	---

Performance Metrics

Annual Production Capacity

38000 km

Pipeline Capacity
