

Blue Insulated Electrical Wire

This insulated electrical wire is suitable for internal wiring of electronics and appliances. The wire is wound on a spool for convenient dispensing and storage.

Product Overview

Versatile PVC Insulated Electrical Wire

This PVC insulated copper wire is designed for reliable performance in residential, construction, and industrial applications. Available in both solid and stranded configurations, it meets international standards for safety and efficiency. With a wide range of nominal areas and customizable color options, this wire is engineered to fit diverse consumer requirements while maintaining consistent electrical conductivity.

Technical Specifications

Maximum Conductor Temperature

70 °C Operating Temp	90 °C Max Temp
--------------------------------	--------------------------

Voltage Rating	450/750V (or 300-500V for specific models)
Insulation Material	PVC (Polyvinyl Chloride)
Conductor Material	Copper

Logistics

Packaging

- 100m or 200m per roll
- Multiple rolls per pallet
- Approx. 23-25mt per 20' container

Lead Time	2 weeks
Minimum Order Quantity	1000 Meters
Payment Terms	L/C, T/T

Standards & Compliance

Compliance Standards

JB 8734.15-1998 • Q/ZEL 02-2002 • GB 5023.17-1997 • IEC227

Product Range

Common Nominal Areas

Size	Typical Application
1.5 - 25 mm ²	Standard non-sheathed copper wires
2x1 - 2x16 mm ²	Twin cables
3x2.5 - 5x185 mm ²	Multi-core power cables
