Product Overview

Blue PVC Layflat Hose

This blue PVC layflat hose is designed for efficient water transfer across agricultural, construction, and industrial applications. Constructed from durable PVC, it offers excellent resistance to abrasion, weathering, and chemical degradation for long-lasting performance. The convenient layflat design allows for easy storage and transportation, as the hose can be rolled up compactly when not in use.

Primary Applications

- Agricultural Irrigation
- Industrial Water Transfer
- Construction Dewatering

Technical Specifications

Performance Metrics

10 bar Working Pressure	30 bar Burst Pressure	100 m Standard Length
-----------------------------------	---------------------------------	---------------------------------

Key Features

UV Resistant, High Tensile Strength, Flexible, Abrasion Resistant, Chemical Resistant
