

Blue Recreational Motorized Bicycle

This blue motorized bicycle includes a small engine above the pedals and a silver basket attached to the handlebars. It is equipped with standard bicycle components such as a seat, handlebars, and chain drive.

Product Overview

Blue Recreational Motorized Bicycle

This blue motorized bicycle is designed for recreational use, combining traditional bicycle components with a compact engine. It features practical additions such as a front silver basket, a rear rack, and full fenders, making it suitable for light utility or leisure riding. The engine is conveniently mounted above the pedals, ensuring a balanced and straightforward design for riders.
