

Blue Silicone Gasket Maker

This blue RTV silicone gasket maker is designed for automotive and industrial applications. It forms a seal that resists cracking, shrinking, and migration caused by thermal cycling and is also resistant to oil, water, and antifreeze.

Product Overview

High-Tech Sealing Solution

This blue RTV silicone gasket maker is a professional-grade sealant engineered for diverse automotive and industrial sealing tasks. It is designed to instantly form a reliable, flexible seal that withstands thermal cycling without cracking, shrinking, or migrating. The formula offers exceptional resistance to common fluids, including oil, water, and antifreeze, making it a dependable choice for critical engine and machinery components.

Technical Details

Net Weight	3 oz
Sealant Type	RTV Silicone

Applications

Recommended Applications

- Valve covers
- Intake manifolds
- Oil pump flanges
- Transmission pans
- Water pumps

Performance Characteristics

Key Benefits

Flexible • Durable • Anti-Shrink • Anti-Migration

Resistance Properties	Oil Resistant, Water Resistant, Antifreeze Resistant, Thermal Cycling Resistant
