Product Overview

Versatile Bluetooth Audio Solution

This compact audio amplifier serves as a multi-functional hub for home audio or small venue setups. It seamlessly integrates Bluetooth wireless technology with legacy playback options like USB, SD card, and FM radio. Designed for flexibility, it features dedicated microphone inputs and independent audio tuning, making it an ideal choice for versatile sound reinforcement.

Technical Specifications

Output Power

26 W

Rated Output Power

Dimensions

200 x 180 x 65 mm

Power Requirements

DC 12V, AC 220V 50/60Hz

Connectivity & Features

Supported Inputs

- Bluetooth (10-15m range)
- USB Drive
- SD/MMC Card
- AUX Input
- Dual Microphone Inputs

Key Features

FM Radio • Independent Mic Volume • Bass Control • Treble Control • LED Display

Speaker Compatibility

4-16 Ohm impedance

Design & Build

Build Quality

Metal front panel
