

Bluetooth Body Composition Analyzer Scale

This smart scale accurately measures weight and uses bioelectrical impedance analysis to estimate body composition. It connects wirelessly to smartphones via Bluetooth, syncing data to track progress over time.

Product Overview

Smart Health Monitoring

This advanced body composition analyzer scale utilizes Bluetooth 4.0 technology to seamlessly sync health metrics with your smartphone. Designed for comprehensive monitoring, it tracks weight alongside body fat, water, muscle, and bone percentages. With support for multiple user profiles and a sleek tempered glass design, it is an ideal solution for modern health-conscious households.

Technical Specifications

Capacity

180 kg

Max Weight

400 lb

Max Weight

Division

100 g

Power Source

4 x 1.5V AAA Batteries (Not included)

Connectivity & Compatibility

Connectivity

Bluetooth 4.0

System Requirements

- iOS 8.0 or later
- Android 4.3 or later

Design & Build

Surface Material

6mm Tempered Glass

Display

LCD with white backlight (27.5mm digits)

Features

User Features

- Auto On functionality
- Multiple user profile support
- Large data storage capacity

Measured Metrics

Body Fat %, Body Water %, Muscle Mass %, Bone Mass %, Calorie Intake Estimation
