

Bluetooth Body Composition Analyzer Scale

This Bluetooth-enabled scale measures weight and calculates body fat percentage using bioelectrical impedance analysis (BIA). Data is transmitted to mobile devices via Bluetooth for tracking and analysis.

Product Overview

Comprehensive Body Composition Analysis

This Bluetooth-enabled body composition analyzer scale provides a detailed view of your health metrics beyond just weight. Equipped with four high-precision strain gauge sensors, it accurately tracks body fat, water percentage, bone mass, muscle mass, and daily calorie needs. Designed with a durable tempered glass platform and a clear LCD display, it offers both reliability and ease of use for daily health monitoring.

Measurement & Performance

Maximum Capacity	180 kg
Measurement Division	0.1 kg
Metrics Tracked	Body Fat, Body Water, Bone Mass, Muscle Mass, Daily Calories

Design & Hardware

Platform Material	Tempered glass with safe corners
LCD Display Size	75 x 29.5 mm
Power Source	4 x AAA batteries
Supported Units	kg, lb, st

Logistics & Packaging

Container Loading Capacity

Container Type	Units
1x20'FCL	4896
1x40'FCL	10080
1x40'HQ	11760

Carton Specifications

6 pcs

Pieces per Carton

13.1 kg
