

Bluetooth Body Composition Smart Scale

This smart scale provides comprehensive body composition analysis, measuring weight, body fat percentage, BMI, muscle mass, water percentage, and bone mass. It connects to smart-phones via Bluetooth, allowing users to track their progress using a dedicated app.

Overview

Smart Body Composition Analysis

This Bluetooth-enabled body composition scale offers a comprehensive health tracking solution for professional and personal use. Utilizing a high-precision sensor system, it provides detailed metrics including weight, body fat percentage, BMI, muscle mass, water percentage, and bone mass. The device seamlessly connects to smartphones via Bluetooth, enabling users to monitor their fitness progress over time through a dedicated application.

Technical Specifications

Measurement Capabilities

- Body Weight
- Body Fat Percentage
- BMI (Body Mass Index)
- Muscle Mass
- Water Percentage
- Bone Mass

Power Supply	AAA Batteries
--------------	---------------

Design & Build

Platform Material	Tempered Glass
Display	Large LED Display

Smart Features

Connectivity

Bluetooth

User Profiles	Yes
Auto-User Recognition	Yes
