

Bluetooth Digital Nutritional Scale

This Bluetooth nutritional scale is designed for precise measurement and tracking of food intake. It connects wirelessly to smartphones or tablets, allowing users to monitor nutritional information and track their dietary habits.

Overview

Smart Nutritional Management

This Bluetooth-enabled digital nutritional scale is designed to help users precisely track their dietary intake. By connecting seamlessly to dedicated mobile applications, it provides detailed nutritional breakdowns for meals, including calories, carbohydrates, protein, cholesterol, sodium, and dietary fibers. With a built-in database of 999 popular foods and long-term history logging, it serves as an essential tool for professional health monitoring and weight management.

Technical Specifications
