

Bluetooth Enabled Steering Wheel Lock

This steering wheel lock prevents unauthorized vehicle operation by securing the steering wheel. It incorporates a Bluetooth locking mechanism and a high-security keyhole.

Product Overview

Advanced Security for Your Vehicle

The T-Type Bluetooth Steering Wheel Lock is an advanced security solution designed to prevent unauthorized vehicle operation. Featuring a robust Hyper B-Class lock core, this device offers superior protection with a significantly low mutual opening rate. The integration of Bluetooth technology provides modern convenience, while the anti-burglar keyhole design ensures a high level of physical deterrence.
