Overview

Intelligent Two-Way Car Security System

This advanced two-way car alarm system integrates modern convenience with robust security, featuring Bluetooth Passive Keyless Entry (PKE) and smartphone app connectivity. Designed for intelligent vehicle management, it supports remote engine start, automatic headlight induction, and real-time security alerts. Its modular design simplifies installation and usage, providing a comprehensive upgrade for vehicle control and protection.

Core Features

Key Capabilities

- Bluetooth PKE (Passive Keyless Entry)
- Smartphone App/Push Button Engine Start
- Automatic Headlight Induction
- Shaking Lock/Unlock
- Automatic Window Roll-up
- Vibration Trigger Alert
- Central Door Locking Automation
- Valet/Service Mode

Technical Specifications

Working Voltage	15 V
Working Frequency	433.92 MHz
Static Current	20 mA
Operating Temperature	-40°C to +85°C

Performance & Range

Bluetooth Control Range	50 m
Remote Control Range	800 m
Bluetooth Induction Deviation	0-3
