

Bluetooth Steel Wire Smart Lock

This Bluetooth steel wire smart lock provides high-tech security for valuables. It uses Bluetooth 4.0 for keyless unlocking via a mobile app and features a water-resistant design.

Product Overview

Smart Security Solution

The Bluetooth Steel Wire Smart Lock is a versatile security device designed for modern, keyless convenience. Utilizing Bluetooth 4.0 technology, it allows for instant unlocking via a dedicated mobile app on iOS and Android devices, enabling secure access sharing. Constructed from durable alloy steel, aluminum alloy, and PVC, this lock is built to withstand daily use while maintaining a sleek, protective profile.
