

BMX Freeride Bicycle Pedal

This high-performance BMX freeride bicycle pedal is constructed from aluminum with an extruded and CNC machined body. It features sealed bearings and a CR-MO CNC machined axle for durability and smooth operation, with dimensions of 105x90mm.

Product Overview

High-Performance BMX Freeride Pedal

This high-performance BMX freeride bicycle pedal is engineered for durability and smooth operation in demanding riding conditions. Constructed from aluminum with an extruded and CNC-machined body, it offers a robust platform for riders. Featuring sealed bearings and a CR-MO CNC-machined axle, this component is built to withstand the rigors of freeride and BMX disciplines.

Technical Specifications

Body Material	Aluminum (Extruded/CNC machined)
Bearing Type	Sealed
Axle Material	CR-MO (CNC machined)

Dimensions

Dimensions

105 mm
Length

90 mm
Width

Compatibility

Discipline	BMX, Freeride
