

BNC Coaxial Connector

This BNC (Bayonet Neill-Concelman) connector is designed for coaxial cable connections. It utilizes a bayonet locking mechanism for secure and quick connections in various electronic applications.

Product Overview

Professional BNC Connectivity

The BNC (Bayonet Neill-Concelman) coaxial connector is a high-performance solution designed for secure and rapid signal transmission. Featuring a reliable bayonet locking mechanism, it ensures stable connections in demanding electronic environments. This connector is an essential component for professional video, RF signal transmission, and networking applications.

Technical Specifications

Connector Type	BNC (Bayonet Neill-Concelman)
Locking Mechanism	Bayonet

Applications

Primary Applications	Video Transmission, RF Signal Transmission, Test Equipment, Networking
----------------------	--

Features

Key Benefits

- Secure bayonet locking mechanism
- Quick connection and disconnection
- High signal integrity
- Versatile electronic compatibility
