

BNC Coaxial Connectors

These BNC (Bayonet Neill-Concelman) connectors are designed for coaxial cables. They provide a secure and reliable connection for radio frequency (RF) signals, utilizing a bayonet locking mechanism for quick connect and disconnect.

Overview

BNC Coaxial Connectors

These BNC (Bayonet Neill-Concelman) connectors are engineered for reliable signal transmission in demanding environments. Featuring a robust bayonet locking mechanism, they ensure secure connections that can be quickly engaged or disengaged. This versatile range includes straight plugs, T-adapters, and bulkhead jacks, making them an essential component for test equipment, video systems, and RF signal applications.

Technical Specifications

Available Configurations

- Straight Plugs
- T-Adapters
- Bulkhead Jacks

Locking Mechanism	Bayonet
Common Applications	RF Signals, Test Equipment, Video Systems, Coaxial Cabling

Features

Design Highlights

Quick Connect/Disconnect • Secure Locking • Dust Cap Compatible
