

Body Worn Camera with 4G and WiFi

This body worn camera captures video, audio and image evidence. It can send live video to a dispatching center via 4G/WiFi.

Overview

Advanced Law Enforcement Body Camera

This body-worn camera is engineered to enhance transparency and real-time communication for law enforcement and security professionals. It features 4G, 3G, WiFi, and Bluetooth connectivity, allowing for live video and audio transmission, GPS tracking, and instant alerts. With a rugged IP68-rated design and 10 hours of continuous recording, it provides a reliable, long-lasting solution for critical field operations.
