

Bolt Cutter with Compound Action

This bolt cutter is designed for cutting bolts, rods and other metal materials. It features hardened steel jaws and a compound action mechanism for increased cutting power and ergonomic handles.

Product Overview

Professional Grade Cutting Power

This high-leverage bolt cutter is engineered for demanding tasks involving bolts, rods, and various metal materials. It features a specialized compound action mechanism that significantly increases cutting power while minimizing user effort. Designed for both professional construction sites and industrial maintenance, the tool combines durability with ergonomic comfort to reduce fatigue during extended use.

Technical Specifications

Key Features

- High-leverage design
- Hardened steel jaws for durability
- Ergonomic handles
- Reduced fatigue design

Jaw Material	Hardened Steel
Mechanism	Compound Action
Applications	Construction, Industrial, DIY Projects
