Overview

WCJC Series Bolted Brass Connector

The WCJC series bolted brass connector is engineered for secure and reliable connections between electrical equipment and cables. Designed for indoor distribution systems, these connectors feature a durable brass construction with a tin electro-plated surface for enhanced corrosion resistance. The bolted design ensures a strong mechanical grip, facilitating easy installation and long-term performance in power transmission applications.

Technical Specifications

Material and Surface	Brass, Tin Electro Plated
Installation Method	Bolted
Application Environment	Indoor distribution equipment

Dimensions and Compatibility

Model Specifications

Item No.	Conductor (mm ²)	Ø (mm)	A (mm)	L (mm)
WCJC-1	16-25	12.5	21	36.5
WCJC-2	25-35	10.5	22.5	47.5
WCJC-3	50-70	10.8	31	61
WCJC-4	70-95	12.5	32.5	66
WCJC-5	95-120	14.5	35.5	73
WCJC-6	120-150	14.5	35.5	73
WCJC-7	185-240	17.5	46	91
WCJC-8	210-250	17.5	46	91
WCJC-9	300	19.5	56	109.5
WCJC-10	300-500	23	61	121
