

Bonded Logistics Center

This logistics center provides secure warehousing for bonded goods. It facilitates efficient supply chain operations and inventory management.

Facility Overview

Hangzhou Bonded Zone Logistics Center

The First Phase of the Hangzhou Bonded Zone Logistics Center (Type B) represents a strategic infrastructure project designed for advanced bonded logistics operations. The facility features a sophisticated blend of multi-story buildings and expansive warehouse structures tailored for modern supply chain requirements. This complex is engineered to optimize storage density and operational efficiency, providing a robust environment for international trade and bonded warehousing.

Facility Type

Bonded Logistics • Type B
