

Borehole Submersible Deep Well Pump

This pump is designed for water supply from wells or reservoirs, as well as for domestic, civil, and industrial applications. It is also suitable for garden and irrigation purposes.

Overview

High-Efficiency Submersible Pumping Solution

This multistage centrifugal submersible pump is engineered for reliable water extraction from boreholes and deep wells. Designed for versatility, it serves domestic, civil, and industrial water supply needs, as well as garden and irrigation systems. Constructed for durability, the unit features a robust design that ensures consistent performance and longevity in demanding environments.

Operating Conditions

Maximum Fluid Temperature	35 °C
Maximum Sand Content	0.15 %
Maximum Immersion Depth	50 m
Minimum Well Diameter	130 mm

Motor Specifications

Voltage Options

- Single-phase: 220V - 240V / 50Hz
- Three-phase: 380V - 415V / 50Hz

Motor Type	Rewindable
Control Options	Start control box, Digital auto-control box, Floating switch compatible

Compliance & Quality

Certifications

ISO 9001 • CE • RoHS • CCC • GS

Warranty	2 years
Performance Standards	ISO 9906
