

Boring Knife for Apparel/Shoe Machinery

This boring knife is a component for garment, shoe, and accessory manufacturing machinery. It is precision-engineered for creating precise holes and cuts in various materials.

Product Overview

Precision Boring Knife for Industrial Machinery

This precision-engineered boring knife is specifically designed for garment, shoe, and accessory manufacturing machinery. It facilitates accurate hole creation and cutting across a variety of industrial materials. Built with a robust construction and a spring-loaded mechanism, it ensures consistent, high-performance operation in demanding manufacturing environments.

Technical Specifications

Construction

Robust • Industrial Grade • Precision-Engineered

Primary Application

Apparel Manufacturing, Shoe Production, Textile Machinery, Accessory Manufacturing

Mechanism

Spring-loaded
