

Bottom-Freezer Refrigerator

This refrigerator is a household appliance designed to keep food cold. It features a two-door design, with the freezer compartment located at the bottom and the refrigerator compartment at the top.

Product Overview

Professional Bottom-Freezer Refrigerator

This modern, two-door refrigerator is expertly engineered for optimal food preservation and efficient cooling. Featuring a sleek metallic finish, the unit provides a contemporary aesthetic suitable for high-end professional or residential environments. The bottom-freezer configuration ensures that the primary fresh food compartment is easily accessible, enhancing daily operational convenience.
