

Bow Saw for Woodworking

This bow saw, also known as a bucksaw, is designed for cutting wood. It consists of a thin blade held under tension in a bow-shaped frame made of steel or aluminum.

Overview

Professional Bow Saw

This high-performance bow saw, also known as a bucksaw, is designed for efficient woodworking and garden maintenance tasks. It features a robust bow-shaped frame constructed from durable steel or aluminum, ensuring stability during use. The hardened steel blade is held under high tension, equipped with coarse teeth for rapid and clean cutting performance.
