

Bow Saw with Steel Frame

This bow saw features a tubular steel frame and a toothed blade designed for cutting wood. The frame is painted for corrosion resistance and includes an ergonomic handle.

Product Overview

Professional Bow Saw

This bow saw features a robust tubular steel frame designed for durability and efficient wood cutting. Equipped with a reliable tensioning mechanism, it ensures the blade remains taut for precise and stable performance. The frame includes a corrosion-resistant coating and an ergonomic handle, making it a dependable tool for various outdoor and workshop wood-cutting tasks.
