

Bow Saw with Steel Frame

This bow saw features a tubular steel frame and a toothed blade. It includes a tensioning mechanism to secure the blade for cutting wood and other materials.

Overview

Professional Bow Saw

This bow saw is engineered for efficient wood cutting and general material processing. It features a robust yet lightweight tubular steel frame that ensures durability while maintaining maneuverability during operation. The integrated tensioning mechanism allows for secure blade locking, while the replaceable blade design ensures long-term utility and cost-effectiveness for professional users.

Technical Specifications

Design Type

Bow Saw • Tensioning Mechanism

Frame Material

Tubular Steel

Blade Characteristics

Toothed, Replaceable

Usage

Applications

- Wood cutting
- General material processing
