

Bow Saw with Tubular Steel Frame

This bow saw is designed for efficient cutting of wood and other materials. Its tubular steel frame provides leverage and tension to the blade, ensuring stability and precision during operation.

Product Overview

Professional Grade Bow Saw

This bow saw features a robust tubular steel frame designed to provide superior leverage and consistent blade tension. Engineered for efficiency, the saw is ideal for demanding outdoor tasks including pruning, camping, and general wood cutting. Its stable design ensures precision and durability, making it an essential tool for professional wood management and forestry applications.

Technical Specifications

Design Features

- High-tension tubular steel frame
- Secure blade attachment system
- Ergonomic leverage design

Frame Material	Tubular Steel
Frame Color	Green
Applications	Pruning, Camping, Wood Cutting, Forestry
