

Box End Spud Ratchet Wrench

This box end spud ratchet wrench is designed for use in potentially hazardous environments. It is widely used in the petrochemical, mining, gas station, and railway industries.

Product Overview

Professional Box End Spud Ratchet Wrench

This box end spud ratchet wrench is specifically designed for high-stakes environments where safety is paramount. Engineered for use in flammable and explosive atmospheres, it is a trusted tool for professionals in the petrochemical, mining, and railway industries. Its dual-function design combines a reliable ratchet mechanism for efficient fastening with a spud end for precise bolt hole alignment.

Technical Specifications

Material	Copper alloy
Finish Options	Polished, Electrostatic spraying
Manufacturing Technique	Casting, Forging
Dimensions	420 x 240 mm

Logistics & Standards

Quality Certifications

ISO9001 • UKAS

Packaging	Individual bag and box
Monthly Supply Ability	8000 pieces

Applications

Recommended Industries

- Petrochemical
- Mining
- Gas Stations
- Railway
