

Box Type Condensing Unit with V-Type Condenser

This box type condensing unit is designed for cold room and cold store applications. It features a V-type condenser for efficient heat exchange.

Overview

High-Efficiency Cooling Solution

This box-type condensing unit features a high-efficiency V-type air-cooled condenser, designed to maximize heat exchange performance while minimizing power consumption. Engineered for versatility, it supports multiple refrigerants and is suitable for a wide range of medium to super-low temperature applications, including cold storage, industrial refrigeration, and pharmaceutical cooling. The unit is built for easy site installation, allowing for quick deployment and reliable operation in professional settings.

Technical Specifications

Operating Conditions

- Medium temperature
- Low temperature
- Super low temperature

Compatible Refrigerants

R22, R134A, R404A, R507A

Applications

Common Industry Applications

Food Storage • Chemical Industry • Pharmaceutical • Display Cases • Supermarkets • Industrial Refrigeration

Service & Warranty

Warranty Period

1 year

Installation & Design

User-Centric Design

The unit is designed with the end-user in mind, prioritizing ease of installation. Engineering practices ensure that site setup requires only minimal work, allowing the machine to be put into operation quickly and efficiently.
