Product Overview

Precision Woodworking Performance

This high-quality brad point drill bit is engineered specifically for clean, precise drilling in wood applications. Featuring a specialized brad point tip, it ensures accurate starting positions and minimizes splintering for professional-grade results. Constructed from durable C65 alloy steel, these bits are designed to provide consistent, reliable performance for various woodworking projects.

Technical Specifications

Key Design Features

- Brad point tip for accurate centering
- Minimized splintering
- Sharp cutting edges for smooth holes

Dimensions Overview

3 mm

Minimum Diameter

16 mm

Maximum Diameter

Material Composition

C65 Alloy Steel

Available Size Range

3mm x 61mm, 16mm x 178mm
