

Braided Stainless Steel Flexible Connector Tube

This flexible connector tube features a braided stainless steel exterior for enhanced durability. It has standard fitting connections for easy installation and a non-toxic inner core for safe water conveyance.

Product Overview

High-Performance Flexible Connector

This braided stainless steel flexible connector tube is engineered for superior durability and corrosion resistance in demanding plumbing environments. It features a specialized non-toxic inner core, ensuring safe water conveyance for various applications. Designed to handle significant pressure and temperature fluctuations, this connector provides a reliable, leak-free solution for professional plumbing installations.

Technical Specifications

Installation Features

- Standard fitting connections
- Easy installation
- Leak-free design

Performance Capabilities

1 High

Pressure Resistance

1 Variable

Temperature Tolerance

Durability & Safety

Corrosion Resistant • Non-Toxic • Leak-Free

Construction Materials

Braided Stainless Steel Exterior, Non-toxic Inner Core
