

Braided Stainless Steel Water Connector Hose

This flexible water connector hose is constructed from braided stainless steel for durability and corrosion resistance. It features a 90-degree elbow fitting on one end and a straight fitting on the other, both with hexagonal nuts for easy tightening.

Product Overview

Flexible Water Supply Solution

This braided stainless steel connector hose is engineered for reliability and durability in plumbing applications. Designed for connecting water supply lines to fixtures like faucets and toilets, its flexible construction ensures easy installation even in confined spaces. The braided exterior provides superior protection against bursting and kinking, while the integrated color-coded stripes indicate compatibility for both hot and cold water systems.

Technical Specifications

Fitting Types

- 90-degree elbow fitting
- Straight fitting

Material	Braided Stainless Steel
Fastening	Hexagonal nuts

Features

Key Benefits

Burst Resistant • Kink Resistant • Corrosion Resistant • Flexible Design

Compatibility	Hot Water, Cold Water, Faucets, Toilets
