

Brake Drum for Automotive Applications

This brake drum is suitable for use in US, European, and Asian cars, trucks, buses, tractors, and trailers. It is made from durable materials for optimal brake pad contact.

Product Overview

Heavy-Duty Brake Drum

This high-performance brake drum is engineered for robust braking reliability across a wide range of automotive applications, including cars, trucks, buses, and heavy machinery. Constructed from premium ductile cast iron, it is designed to withstand extreme friction and high operating temperatures. The precision-machined surface ensures optimal contact with brake pads, delivering consistent and safe stopping power for demanding environments.

Technical Specifications

Material	Ductile Cast Iron
Compatible Part Numbers	346 423 0501, 346 423 0601, 658 421 0001, 410026 2410002, 305 423 0601, 305 421 0401, 3054210401

Logistics

Packaging	Pallets
-----------	---------

Compatibility

Supported Vehicle Types

- Cars
- Trucks
- Buses
- Tractors
- Trailers

Compatible Makes

Benz • BPW • DAF • Fruehauf • HINO • Inveco • Tatra T815 • Ford • Nissan • Mitsubishi • Scania • SAF • Toyota • Webb • Volvo • MTZ
