

Brake Drum for Cars, Trucks, Buses and Trailers

These brake drums are suitable for use in a variety of US, European, and Asian vehicles, including cars, trucks, buses, and trailers. They are manufactured to a high standard.

Product Overview

High-Performance Brake Drums

These high-quality brake drums are engineered for reliable performance across a wide range of US, European, and Asian vehicles, including cars, trucks, buses, tractors, and trailers. Constructed from durable gray iron and precision-machined via CNC, they ensure optimal fit, balance, and heat dissipation for consistent braking. Designed for demanding operating conditions, these drums offer robust durability and are available for custom OEM manufacturing based on your specific drawings or samples.

Technical Specifications

Material	Gray iron
Machining Method	CNC Machined
Compatible Vehicles	Cars, Trucks, Buses, Tractors, Trailers

Logistics & Manufacturing

Production Timeline

Process	Duration
Mould Making	15-20 days
Sample Preparation	5-7 days
Production	Approx. 20 days

Packaging	Pallets
