

Brake Master Cylinder Assembly

This is a brake master cylinder assembly. It converts mechanical force from the brake pedal into hydraulic pressure to actuate the vehicle's brakes.

Overview

Brake Master Cylinder Assembly

This brake master cylinder assembly is engineered to provide reliable hydraulic pressure conversion for vehicle braking systems. Designed as a direct replacement component, it includes the essential reservoir and cylinder body required for effective brake actuation. This assembly is specifically compatible with the 2004 Dodge Ram 1500 1/2 ton 2WD platform.

Compatibility

Compatible Vehicles

- 2004 Dodge Ram 1500 1/2 Ton 2WD

OE Number

M3080

Technical Details

Assembly Type

Brake Master Cylinder

Class

M3080
