

Brass Angle Valve, 1/2" DN15 Connection

This is an angle valve. It is made of brass, has a full bore design, and features a 1/2" size and DN15 connection.

Product Overview

Professional Grade Brass Angle Valve

This high-quality brass ball angle valve is engineered for reliable flow control in plumbing and industrial applications. Featuring a robust full-bore design, it ensures optimal flow capacity and minimal pressure drop. The compact 1/2" (DN15) connection makes it a versatile choice for standard piping systems, balancing durability with precise dimensions.
