

Brass Angle Valve

This angle valve is constructed from durable brass, offering excellent corrosion resistance and long-lasting performance. It is suitable for use in various plumbing and industrial applications requiring a 90-degree connection.

Product Overview

Professional Brass Angle Valve

This durable brass angle valve is designed for reliable flow control in plumbing and industrial piping systems. Featuring a polished chrome-plated finish, it offers excellent corrosion resistance and a clean aesthetic. The valve is built with a sturdy brass body and core, ensuring long-lasting performance in water applications.

Technical Specifications

Available Sizes

- 1/2" x 3/8"
- 1/2" x 1/2"

Maximum Pressure

10 bar

Max Pressure

Minimum Temperature

-10 °C

Suitable Medium

Water

Thread Standard

ISO-228-1:2000

Construction & Materials

Finish

Polished • Chrome Plated

Body Material

Brass

Handle Material

Zinc (Brass)

Core Material

Brass
