

Brass Ball Valve

This ball valve is made of durable brass. It allows for efficient flow regulation with smooth quarter-turn operation and is suitable for various media including water, oil, and gas.

Product Overview

High-Performance Brass Ball Valve

This high-quality brass ball valve is engineered for demanding industrial and plumbing applications. Featuring a robust brass body, it offers reliable fluid control for water, oil, and gas media. The design includes a smooth quarter-turn operation with a durable lever handle, ensuring efficient flow regulation and long-lasting performance in professional environments.

Technical Specifications

Nominal Diameter (DN)	20 mm
Nominal Pressure (PN)	16 bar

Design & Construction

Body Material	Brass
Operation Type	Quarter-turn lever handle

Application Suitability

Recommended Usage

Industrial • Plumbing

Compatible Media	Water, Oil, Gas
