

Brass Ball Valve DN15-50

This ball valve offers reliable flow control in industrial settings. Constructed from durable brass, it features a robust ball mechanism for tight shutoff and includes a lever handle for easy operation.

Product Overview

Precision-Engineered Brass Ball Valve

This precision-engineered ball valve is designed for reliable flow control across various industrial applications. Constructed from durable brass, the valve features a robust ball mechanism that ensures a tight shutoff and minimal pressure drop. It is suitable for use with water, oil, and gas, and includes a lever handle for easy operation and clear position indication.
