

# Brass Ball Valve for Fluid and Gas Control

This brass ball valve is designed for efficient flow control in fluid and gas applications. It features a durable brass body and smooth quarter-turn operation.

## Product Overview

### High-Performance Brass Ball Valve

The JL-7451 is a high-quality brass ball valve engineered specifically for HVAC&R applications, offering reliable fluid and gas control. It features a durable brass body and a smooth quarter-turn operation for efficient flow management in demanding environments. Designed for long-lasting performance with minimal maintenance, this valve ensures secure sealing across its specified pressure and temperature ranges.

## Technical Specifications

ART NO.	SIZE
JL-7451	1/2" x 3/4"
	3/4" x 3/4"

Technical sizing options for the JL-7451 series ball valves.

### Nominal Pressure

**25 bar**  
PN

### Available Sizes

- 1/2" x 3/4"
- 3/4" x 3/4"

### Article Number

JL-7451

## Design & Construction

### Body Material

Brass

### Operation

Quarter-turn manual operation

## Compliance & Applications

### Certifications

ACS

### Applications

HVAC&R, Fluid Control, Gas Control, Flow Management
